PROFILE

Informatics Engineering student (ISEP, 2nd year) with hands-on experience across academic and personal software projects, and practical exposure to backend development in a professional setting. Comfortable working across the stack, with a solid foundation in algorithms, data structures and software design.

EDUCATION

ISEP – Instituto Superior de Engenharia do Porto

Porto, Portugal

Degree in Informatics Engineering — Current Grade: **17.75/20**

Sep 2024 – Present

- 1st and 4th semester integrative projects graded **19/20**; 2nd and 3rd semester integrative projects ranked among the **Top 3** of their respective semesters.

Instituto de Línguas Helena Nicolau

São João da Madeira, Portugal

English Language Course

Sep 2022 – Jun 2023

Escola Secundária Dr. Serafim Leite

São João da Madeira, Portugal

Science and Technology Course — Final Grade: **18/20**

Sep 2021 – Aug 2024

HARD SKILLS

Programming Languages: Java, C, Python, SQL, PL/SQL, RISC-V (Assembly), HTML, CSS, TypeScript, C# (Unity)

Frameworks & Libraries: JavaFX, Hibernate, ANTLR, Next.js, React, Tailwind CSS, Prisma, Supabase, Unity

Databases: Oracle Database, PostgreSQL, MySQL

Tools & Practices: Git, GitHub, Maven, JUnit, OOP, Debugging, Scrum

SOFT SKILLS

Mindset: Problem Solving, Critical Thinking, Attention to Detail, Continuous Learning

Collaboration: Clear Communication, Teamwork & Collaboration, Leadership

Work Ethic: Commitment, Adaptability, Project Management

PROJECTS

Personal Portfolio Website

[GitHub](#)

Personal Project

Feb 2026 – Present

- Built a responsive React 18 + TypeScript SPA with an interactive academic/professional timeline, dark/light theme, and a custom-built image lightbox with zoom/pan, showcasing 5 projects.
- Tools: React, TypeScript, Vite, Tailwind CSS, shadcn/ui.

Follow Your Past — GameJam 2026

NEI-ISEP GameJam

Mar 2026

- Developed a top-down escape-room puzzle game with a 5-person team (141 commits) in **47 hours**, learning **Unity (C#)** from scratch under competition pressure. **Ranked 3rd** out of all participating teams.
- Implemented a distinctive “time-loop” mechanic (recorded player runs replayed as a cooperating clone) across ~1,350 lines of C#.

AI Safe — Flight Control & Management System

4th Semester University Integrative Project

Feb 2026 – Jun 2026

- Delivered 37 user stories in a 5-person team (493 commits, 60,000+ lines of Java) covering flight management, weather data and backoffice configuration, backed by 111 JUnit test files.
- Built a Flight Plan DSL with ANTLR4 (lexical/syntactic/semantic validation) and a multiprocess flight simulator in C using POSIX semaphores. Final grade: **19/20**.

Logistics On Rails

[GitHub](#)

3rd Semester University Integrative Project

Sep 2025 – Jan 2026

- Built a 70,000+ line Java system with a 5-person team, serving 15+ user roles across warehouse, fleet and route management, persisted in Oracle Database (PL/SQL).
- Implemented graph algorithms from scratch (Dijkstra, Bellman-Ford, Edmonds-Karp, Kruskal) and AVL/KD-Tree structures, covered by ~100 JUnit tests. **Ranked Top 3**.

ExpliGest — Tutoring Management Platform

Personal Project

Feb 2026 – Jul 2026

- Built and shipped a full-stack platform managing students, calendar, and payments, with a 10+ chart analytics dashboard used in real tutoring practice.
- Designed automatic FIFO payment allocation and enforced multi-tenant data isolation via PostgreSQL Row Level Security. Tools: Next.js, TypeScript, Supabase, Recharts.

Collectify — Sticker Collection App

Personal Project

May 2026

- Designed and built a sticker-trading web app in 24 days (77 commits), cataloging 1,074 items with real-time chat, PDF checklist export and a mobile-first quick-entry mode.
- Tools: Next.js, React, TypeScript, Supabase (PostgreSQL, RLS), PWA.

Railway Network Simulation System

[GitHub](#)

2nd Semester University Integrative Project

Mar 2025 – Jun 2025

- Implemented graph algorithms from scratch (Dijkstra, Warshall, Hierholzer) across 65,000+ lines of Java, validated with Python notebooks on synthetic networks up to 1,500 stations.
- Covered by 147 JUnit tests with JaCoCo coverage tracking. **Ranked Top 3**.

Face Recognition System using Eigenfaces

[GitHub](#)

1st Semester University Project (LAPR1)

Dec 2024 – Jan 2025

- Implemented the Eigenfaces (PCA) algorithm from scratch in 1,478 lines of Java: spectral decomposition, image compression/reconstruction and face recognition.
- Final grade: **19/20**. Tools: Java, Apache Commons Math, Python.

EXPERIENCE

Backend Developer

Jun 2026 – Present

Adhara Academy

Santa Maria da Feira, Portugal

- Developing the backend of Adhara QBank, a question-bank platform for medical exam preparation.

Ambassador — CGI Ambassadors Program

Dec 2025 – Present

CGI Group

Porto, Portugal

- Selected for the CGI Ambassadors Program, representing CGI's commitment to growth, collaboration and future development.
- Invited by CGI leadership in recognition of academic excellence and professional potential.

Member — Informatics Department (NEI)

Oct 2025 – Present

Núcleo de Estudantes de Informática do ISEP

Porto, Portugal

- Contributing to the development and maintenance of the student association's digital presence and events.
- Co-developed the official **FallStack 2025** event website using TypeScript, Next.js, Prisma, Tailwind CSS and Supabase.

Futsal Referee

Nov 2022 – Present

Associação de Futebol de Aveiro (AFA)

Aveiro, Portugal

- Officiating futsal matches at regional level, developing decision-making, communication and pressure management skills.
