EDUCATION

ISEP – Instituto Superior de Engenharia do Porto
Degree in Informatics Engineering — Current Grade: 17.75/20

Porto, Portugal
Sep 2024 – Present

Instituto de Línguas Helena Nicolau
English Language Course

São João da Madeira, Portugal
Sep 2022 – Jun 2023

Escola Secundária Dr. Serafim Leite
Science and Technology Course — Final Grade: 18/20

São João da Madeira, Portugal
Sep 2021 – Aug 2024

TECHNICAL SKILLS

Programming Languages: Java, C, Python, SQL, HTML, RISC-V Assembly

Frameworks & Libraries: JavaFX, Java Swing, Java Collections Framework

Tools & Technologies: Git, GitHub, Linux, VS Code, Visual Paradigm, IntelliJ IDEA

Databases: Oracle SQL, MySQL

Core Competencies: OOP, Data Structures, Algorithms, UML, Operating Systems, Version Control

RELEVANT EXPERIENCE

Academic Work – ISEP

Informatics Engineering Coursework

2024 – Present

- Developed Java applications using OOP, JavaFX and structured problem-solving.
- Implemented algorithms and systems-level programming in C and RISC-V Assembly.
- Worked in team-based projects, applying communication and organisation skills.

Gulbenkian Scholars' Meeting – Fundação Calouste Gulbenkian

Cultural and Academic Exchange Event

22–23 Feb 2025

- Invited due to an excellence-level admission score of **187.30**.
- Participated in cultural activities, musical performances and art exhibitions.
- Networked with students across different fields.

PROJECTS

- **Personal Portfolio Website (Fev 2026 – Present)** Interactive portfolio website showcasing academic background, professional experience and technical projects, with a responsive and modular frontend architecture. [GitHub](#)
- **Logistics On Rails (Sep 2025 – Jan 2026)** Integrative project developing a software system for warehouse management and freight logistics in railway networks. Ranked among the **Top 3** projects. [GitHub](#)
- **FallStack 2025 Website — NEI (Oct 2025 – Nov 2025)** Contributing to the official event website using TypeScript, Next.js, Prisma, Tailwind CSS and Supabase.
- **Railway Network Simulation System (Mar 2025 – Jun 2025)** JavaFX simulation tool implementing stations, routes, industries, trains, connectivity analysis and KPIs. Ranked among the **Top 3** projects. [GitHub](#)
- **Futsal Referee Management App (Jul 2025 – Aug 2025)** Java/JavaFX OOP application to manage monthly earnings, clubs, venues, matches and statistics.
- **Face Recognition System using Eigenfaces (Dec 2024 – Jan 2025)** Java-based PCA/Eigenfaces facial recognition system: eigenvectors, dimensionality reduction, reconstruction and similarity matching. Final grade: **19/20**. [GitHub](#)

EXTRACURRICULAR ACTIVITIES

- **Member — Informatics Department (NEI)** — since Oct 2025
- **Futsal Referee — Associação de Futebol de Aveiro (AFA)** — since Nov 2022
